

:60 Mercury Free March Script

The silver mercury fever thermometer you have in your home may be harmful to you, your family and the environment - especially if it breaks. During the month of March, protect your family and get a new digital thermometer, absolutely free, just by bringing your mercury thermometers to a participating Leader Pharmacy. Place them in a small plastic sandwich bag for safe collection and your Leader Pharmacist will make the exchange.

No purchase is necessary while supplies last at participating Leader Pharmacies. For more information on the location nearest you call (916) 875-6644 or visit us on the web at www.bemercuryfree.net.

The next time you reach for your thermometer, you'll feel safer knowing that you helped remove mercury from your home and the environment. A message from Leader Pharmacies and Be Mercury Free, A Regional Partnership for Mercury Pollution Reduction.
